

1.4kW BENCH MOUNT

AC-HVDC POWER SUPPLIES

The MCP1K4 series are highly stable switch-mode power supplies with low ripple and a floating output. Due to the high switching frequency the power supply has a low residual ripple in the generated output voltage with high stability, good regulation dynamics, and at the same time only a low amount of stored energy.

## Dimensions

See mechanical details table

## Features

- Output voltages 0-125VDC to 0-2kVDC floating
- Single phase AC input
- Continuous operation at full rated power
- Multi-function control panel with user friendly interface
- Digital, LAN and USB interface option
- Analog programming/interface option
- Manual voltage and current control with digital display
- Set-point display via a button
- Set-point adjustment possible with disabled output
- Push-button switch for output voltage
- Short circuit & arc protection
- 2 year warranty

## Benefits

- Provides maximum device control & flexibility.
- Safe operation ensures maximum protection to the power supply
- High voltage release included for safe operation at high voltage output
- User friendly controls
- Lighter than the leading brand products & easier to maintain
- Low cost of ownership

## Applications

- Electrostatics
- High voltage test equipment
- Insulation testing
- Ion sources
- Laboratory power

## Models & Ratings

| Model Number | Polarity | Output Voltage | Output Current | Input Voltage | Frequency  |
|--------------|----------|----------------|----------------|---------------|------------|
| MCP1K4-125   | Floating | 0 to 125V      | 0 to 10A       | 230VAC ±10%   | 47 to 63Hz |
| MCP1K4-200   | Floating | 0 to 200V      | 0 to 5A        | 230VAC ±10%   | 47 to 63Hz |
| MCP1K4-350   | Floating | 0 to 350V      | 0 to 3A        | 230VAC ±10%   | 47 to 63Hz |
| MCP1K4-650   | Floating | 0 to 650V      | 0 to 2A        | 230VAC ±10%   | 47 to 63Hz |
| MCP1K4-1250  | Floating | 0 to 1.25kV    | 0 to 1A        | 230VAC ±10%   | 47 to 63Hz |
| MCP1K4-2000  | Floating | 0 to 2kV       | 0 to 600mA     | 230VAC ±10%   | 47 to 63Hz |

## Options

- Coarse/fine-potentiometers (99% / 1%) for more accurate adjustment of voltage and / or current
- Analog programming/interface
- Analog programming/interface, floating
- Computer interfaces -IEEE 488, RS 232, RS 422, RS485, Profi-bus DP, USB, LAN (more on request)
- Signal for output voltage <50VDC
- Lower ripple:  $<1 \times 10^{-5} + 100\text{mVpp}$
- Higher stability: Stability, over 8 hours under constant conditions  $<\pm 1 \times 10^{-5}$   
Temperature coefficient  $<\pm 1 \times 10^{-5}/\text{K}$  within the specified temperature range
- Lower stored energy
- Supply voltages other than that shown in the models & ratings table may be specified

Please consult XP Power Sales

## Input

| Characteristic       | Minimum                      | Typical | Maximum | Units | Notes & Conditions |
|----------------------|------------------------------|---------|---------|-------|--------------------|
| Input Voltage        | See models and ratings table |         |         |       |                    |
| Efficiency           |                              | 90      |         | %     |                    |
| Overvoltage Category |                              | II      |         |       |                    |
| Protection Class     |                              | I       |         |       |                    |

## Output

| Characteristic             | Minimum  | Typical | Maximum | Units | Notes & Conditions |
|----------------------------|--|---------|---------|-------|--------------------|
| Output Voltage Range       | See models and ratings table   |         |         |       |                    |
| Output Current Range       | See models and ratings table   |         |         |       |                    |
| Output Control             | Continuous adjustment from 0 to rated voltage/current by front panel mounted encoders  |         |         |       |                    |
| Output Polarity            | Both output poles are floating. Either the positive or the negative pole can be earthed. In devices with non-isolated Analog programming/ interface (option), one pole is permanently earthed.   |         |         |       |                    |
| Output Isolation           | Devices with a rated voltage of up to 350VDC are isolated for $\pm 500$ VDC. Devices with a rated voltage between 650VDC and 2000VDC are isolated for $\pm 2000$ VDC. With these devices, always both connection cables must be connected to the load, as the outputs do not have any potential against ground. If the cable shield is to be used to return the current, the other output must be short-circuited to ground. |         |         |       |                    |
| HV Output Connection       | For outputs $\geq 650$ VDC two mating HV connectors with 3m cable are supplied   |         |         |       |                    |
| Voltage Control Time       | <1ms with load changes from 10% to 100% or 100% to 10%, respectively   |         |         |       |                    |
| Voltage Setting Range      | Using the VOLTAGE potentiometer, approx. 0.1% to 100% of the rated value   |         |         |       |                    |
| Current Control Time       | <10ms with load changes that effect a change of less than 10% in the output voltage  |         |         |       |                    |
| Current Setting Range      | Using the CURRENT potentiometer, approx. 0.1% to 100% of the rated value   |         |         |       |                    |
| Setting Time at Rated Load | <100ms to 500ms, depending on type, for changes in the output voltage from 10% to 90% or 90 to 10%, respectively   |         |         |       |                    |
| Set Point Resolution       | $< \pm 1 \times 10^{-3}$ of rated value with potentiometer on front panel<br>$< \pm 1 \times 10^{-5}$ of rated value with fine potentiometer<br>$1 \times 10^{-4}$ of rated value with option interface  |         |         |       |                    |
| Discharge Time Constant    | With output free of load max. 10s<br>Discharge time to <50V max. 60s   |         |         |       |                    |
| Accuracy                   | Voltage $< \pm 0.2\%$ of rated value<br>Current $< \pm 0.2\%$ of rated value for current ranging between >5mA to <200A<br>Current $< \pm 0.5\%$ of rated value for current ranges <5mA or >200A<br>Additional digital display error $< \pm 2$ digits   |         |         |       |                    |
| Residual Ripple            | Up to 350W rated power: $< 5 \times 10^{-5}$ pp + 50mVpp, for 700W and higher: $< 2 \times 10^{-4}$ pp + 200mVpp (measuring bandwidth 30Hz to 10MHz)<br>up to 350W $< 1.5 \times 10^{-5}$ + 20mV of rated value RMS<br>for 700W and higher $< 6 \times 10^{-5}$ + 70mV of rated value RMS  |         |         |       |                    |
| Control Deviation          | $\pm 10\%$ mains voltage variation: $< \pm 1 \times 10^{-5}$ of the rated value<br>Open circuit / full load: $2 \times 10^{-4}$ of the rated value<br>Over 8 hours: $< \pm 1 \times 10^{-4}$ of the rated value<br>Temperature deviations $< \pm 1.5 \times 10^{-4}$ /K of the rated value   |         |         |       |                    |
| Short Circuit Protection   | The power supply is short circuit and arc proof. The maximum current can be drawn at any output voltage, even in the event of a short circuit.   |         |         |       |                    |

## Environmental

| Characteristic        | Minimum  | Typical | Maximum | Units | Notes & Conditions       |
|-----------------------|--|---------|---------|-------|--------------------------|
| Temperature Operation | 0  |         | +40     | °C    |                          |
| Storage Temperature   | -20  |         | +50     | °C    |                          |
| Humidity Operating    | 0  |         | +80     | %     | No precipitation and max |
| Storage Humidity      | Max. relative humidity 80% up to +31°C, decreasing linearly down to 50% relative humidity at +40°C                             |         |         |       |                          |
| Cooling               | Heat generated in the power supply unit is dissipated by convection or, in the case of high-power units, by forced ventilation |         |         |       |                          |
| Operating Altitude    |  |         | 2000    | m     | Above sea level          |
| Protection            | IP20   |         |         |       |                          |

## Signals & Controls

|                 | Function  |
|-----------------|---|
| Front panel     | Voltage and current potentiometer, power switch, HV ON/OFF switch, digital display for current and voltage.<br>Display of the output voltage and current set points is possible with the SETVALUES push-button. |
| Operating Modes | The HV output's polarity is floating (see models & ratings table). The power supplies can be operated in the LOCAL, ANALOG (optional) and DIGITAL (optional) operating modes.                                   |
| Displays        | DVM for voltage and current, range ±20000   |

## EMC: Emissions

| Phenomenon        | Standard    | Notes & Conditions |
|-------------------|-------------|--------------------|
| Harmonic Currents | EN61000-6-2 |                    |
| Voltage Flicker   | EN61000-6-3 |                    |

## Safety Approvals

| Safety Agency | Safety Standard                  | Notes & Conditions |
|---------------|----------------------------------|--------------------|
| EN            | EN61010-1                        |                    |
| CE            | Meets all applicable directives  |                    |
| UKCA          | Meets all applicable legislation |                    |

## Mechanical Details

Front view with controls

Front panel shown for illustrative purposes only, dimensions and layout differ by power rating - see mechanical details table.

| Number | Function   | Number | Function   |
|--------|--|--------|--|
| 1      | AC power switch with indicator light. Disconnects the power supply from the mains, two-pole switching    | 10     | LED for constant current control mode (Constant Current CC)                      |
| 2      | Release of DC output (OUTPUT)<br>No isolation from mains!  | 11     | Ten-turn potentiometer with lockable precision dial for current adjustment       |
| 3      | LED: DC output ON<br>Green when the controller and the power stage is released (OUTPUT ON)               | 12     | LED BUSY displays data traffic on the digital interface (Optional)               |
| 4      | LED: Overtemperature: Internal temperature too high, fan failed or contaminated. (Use is type-dependent) | 13     | Switching the operation mode between REMOTE/ANALOG and REMOTE/DIGITAL (Optional) |
| 5      | Voltage display: actual value, flashing: set point   | 14     | LED indicating digital programming active (Optional)                             |
| 6      | LED for constant voltage control mode (Constant Voltage CV)  | 15     | LED indicating Analog programming/ interface active (Optional)                   |
| 7      | Ten-turn potentiometer with lockable precision dial for voltage adjustment                               | 16     | Switching the operation mode between LOCAL and REMOTE (Optional)                 |
| 8      | SET VALUES Switch displays between set value and actual value. Displays flash when in set-point mode.    | 17     | LED LOCAL control mode active (Optional)   |
| 9      | Current display: actual value, flashing: set point   |        |  |

Mechanical Details

Rear view with single phase AC input

Rear panel shown for illustrative purposes only, dimensions and layout differ by power rating - see mechanical details table.

| Number | Function  | Number | Function   |
|--------|---|--------|--|
| 1      | AC input with mains fuses<br>Up to 700W: IEC connector (as shown) with integrated fuse, at 1400W, C20 mains cable in accordance with IEC60320-C20, equipped with automatic circuit breaker. | 5      | For power supplies with 650VDC or higher output voltage:<br>Positive HV output (designated for screened output cable with grounded screen. To let the current flow back via the screen, the other (negative) output must be shorted to ground)<br><br>For power supplies up to 350VDC output voltage:<br>HV-output with safety laboratory socket |
| 2      | (Optional) 15-pin Sub-D connector for Analog programming/ interface   | 6      | For power supplies with 650VDC or higher output voltage:<br>Negative HV output (designated for screened output cable with grounded screen. To let the current flow back via the screen, the other (positive) output must be shorted to ground)<br><br>For power supplies up to 350VDC output voltage:<br>HV-output with safety laboratory socket |
| 3      | (Optional) Slot for digital interface (e.g.: IEEE-488, RS232, USB, LAN, ...)  | 7      | Earth bolt (is permanently connected to the protective conductor (PE): This connection must be connected to the ground of the load!  |
| 4      | Air outlet (depending on device type)   | 8/9    | Polarity indication:<br>BLUE: NEGATIVE, RED: POSITIVE  |

## Mechanical Details

| Model Number | Mounting                   | Width |       | Height |       | Depth | Weight |
|--------------|----------------------------|-------|-------|--------|-------|-------|--------|
| MCP1K4-125   | Bench mount <sup>(1)</sup> | 19"   | 443mm | 3U     | 133mm | 450mm | 14kg   |
| MCP1K4-200   | Bench mount <sup>(1)</sup> | 19"   | 443mm | 3U     | 133mm | 450mm | 14kg   |
| MCP1K4-350   | Bench mount <sup>(1)</sup> | 19"   | 443mm | 3U     | 133mm | 450mm | 14kg   |
| MCP1K4-650   | Bench mount <sup>(1)</sup> | 19"   | 443mm | 3U     | 133mm | 450mm | 14kg   |
| MCP1K4-1250  | Bench mount <sup>(1)</sup> | 19"   | 443mm | 3U     | 133mm | 450mm | 14kg   |
| MCP1K4-2000  | Bench mount <sup>(1)</sup> | 19"   | 443mm | 3U     | 133mm | 450mm | 14kg   |

### Notes:

1. Rack mount option

### Cables

#### Mains input cable

Single phase mains: with CEE-7/7

#### Screened HV output cable

3m long with mating connector fitted one end only. Delivered short circuited for safety reasons.
